

Se hurtigt om jeres referencer mangler DOI-henvisninger

Hvis I som tidsskriftsejere ønsker at tilmelde jer CrossRef's DOI-service, skriver I samtidig under på, at I vil sørge for, at alle referencer, der måtte have et DOI og som citeres i de publicerede artikler, indføjes med et sådan i de enkelte referencelister - husk at referencelisterne også skal indsættes som metadata¹. I er derfor nødt til at tjekke om artiklernes forfattere har sørget for, at DOI'erne står anført. Det kan tage sig lidt uoverskueligt ud, specielt hvis der følger en lang litteraturliste med. Heldigvis stiller CrossRef et værktøj til rådighed, der gør processen meget overskuelig.

På CrossRef's hjemmeside - <http://crossref.org/> - finder man værktøjet via linket 'Simple Text Query' i venstremenuen:

The screenshot shows the CrossRef.org homepage. At the top, there is a navigation bar with links for 'ABOUT CROSSREF', 'FOR PUBLISHERS', 'FOR LIBRARIES', 'FOR AFFILIATES', and 'FOR RESEARCHERS'. Below this, the page is divided into several sections. On the left, there is a sidebar with 'Meetings & News' and 'Technical Resources'. The 'Technical Resources' section includes links for 'CrossRef Support', 'CrossRef Labs', 'Report a DOI problem', 'Web deposit form', 'Simple Text Query' (circled in red), 'XML Tools', and 'Browsable title list'. The main content area features a 'Metadata Search' box with a search input field and a '74073123 registered CrossRef DOI links' badge. Below the search box, there is a paragraph describing CrossRef as an association of scholarly publishers. To the right of the search box, there is a 'Google Custom Search' box with a 'Search this Site' button. At the bottom, there is a video player for 'CrossMark: Cite with Certainty' and a notice about the relocation of the blog RSS feeds.

¹ Se: Frederiksen, N., Thestrup, J.: "Hvordan indsætter redaktøren/tidsskriftschefen referencer i overensstemmelse med CrossRef's krav?" i OJS på dansk 6. årg., nr. 5, 2015 DOI: <http://dx.doi.org/10.7146/ojssb.v6i5.20603>

Inden værktøjet kan tages i brug skal man først oprette en konto, der dog er gratis. Dette sker via linket 'free account here'

Simple Text Query Form

This form allows individuals to retrieve CrossRef Digital Object Identifiers (DOIs) for non-commercial use. Please contact us (info@crossref.org) if you represent an organization that needs to retrieve CrossRef DOIs in quantity.

Important Notice: Simple Text Query users will be required to use a verified email address starting on May 5, 2010. You may sign up for a [free account here](#).

We are taking this action because a number of users are querying this service in very high volumes. The Simple Text Query is not an appropriate tool for high volume operations and monthly usage limits of 1000 references will be put into effect (intended to be a limit on an individual or the organization represented by an individual). Please contact CrossRef (info@crossref.org) to inquire about options appropriate for volumes of use above these limits.

How to use this form

This form allows you to retrieve Digital Object Identifiers (DOIs) for journal articles, books, and chapters by simply cutting and pasting the reference list into the box below. You may use the form with any reference style, although the tool works most reliably if references are formatted in a standard style such as shown in this example:

Clow GD, McKay CP, Simmons Jr. GM, and Wharton RA, Jr. 1988. Climatological observations and predicted sublimation rates at Lake Hoare, Antarctica. *Journal of Climate* 1:715-728.

To test the interface, simply cut & paste this reference!

Please separate individual references by a blank line. For best results, there should be no line breaks within an individual reference. When submitting multiple references they must be in alphabetical order or presented as a numbered list. For editorial purposes, to check the accuracy of a reference click on the DOI link that is returned with the reference.

Enter the email address you registered for use of Crossref services. If you have not registered your email address, click [here](#).
